Summary

I am enthusiastic in developing custom responsive websites. My professional goal is to work as a Full-Stack Web Developer. I've worked with a variety of programming languages, including HTML, CSS, JavaScript, Java, Asp.Net, Angular, React, and others. I am also proficient in relational databases. Can create, build, and query databases. Experienced with a range of applications such as VS Code, NetBeans, Visual Paradigm, and Eclipse. Ability to troubleshoot and resolve issues with hardware, software, and network connectivity.

Technical Skills

- **Back-end:** Java, C#, C, Node.
- **Front-end:** HTML, CSS, JavaScript, Angular, Spring Boot, React.
- **Database Management Systems:** SQL, MySQL, Talend.
- **Development Tools:** Android Studio, Visual Studio code, Eclipse, NetBeans, Microsoft Office, Adobe XD, Git.

BACHELORS | CPICA (GUJARAT UNIVERSITY)

Jun 2016 – Mar 2019

Major: Computer Applications

Skills Learned: SQL, Microsoft Office, Object-Oriented Programming, Data Structures, Java, .Net, PHP, Android studio, C++.

Projects

❖ **Event Expert (Android Application)**

- Android App - Designed, developed, and published a new android application called "Event Expert" for Android tablets and mobile phones. Worked with APIs to connect to 3rd party platforms such as Facebook and Amazon web services.
- Tools and technologies that I used in this application is Android studio, Java, PHP and MySQL database.
- This application is developed for a user who is searching for an event in a particular area, and they can participate in the event and see event nearby location and its information using this app. They can also create their own events.
- Created first design of this application using adobe XD.

❖ **Pet Rescue charity (Database)**

- In this project, we helped the fictional organization Pet Rescue Charity with managing their donations data.
- This project's goal was to upload the list to a Central Donation Repository. Task is ETL the process from SQL Server to Oracle, Donation list loading, Created Star schema, loading of star schema, created view and Security.
- Used SQL developer and Talend in this project.
