Project

Event Expert (Android Application)

JUL 2018 – MAR 2019 (CPICA)

Created an Android application using the Android studio tool and java. This application is developed for a user who is searching for an event in a particular area, and they can participate in the event. Users can also see event location and its information using this app. Users can also create their own events.

Pet rescue charity(Database)

SEPT 2021 – DEC 2021 (Sheridan)

In this project, we helped the fictional organization Pet Rescue Charity with managing their donations data. This project's goal was to upload the list to a Central Donation Repository. Task is ETL the process from SQL Server to Oracle, Donation list loading, Created Star schema, loading of star schema, created view, and Created Security. We used sqldeveloper and Talend in our project.

❖ Other

- AKM Coder - Created card game using java
